

STUDENTS AVOIDING DIRTY TOILET

 I REFER to the letter, "School toilets dirty and smelly" (*my paper*, May 5).

My son, who is in secondary school, had been complaining to me about his school toilets.

The common problems are the strong stench of urine and wet toilet floors.

The wet floors encourage bacterial growth and students might slip and fall. Leaky water cisterns add to the problem.

There is also a lack of toilet paper and soap.

These deplorable conditions have discouraged students from using the toilet if they could help it.
