

Improve facilities

“Outram Park MRT station is a major interchange but there are no toilet facilities there.”

MR RONALD LEE: “Outram Park MRT station is a major interchange and a very busy station. Unfortunately, there are no toilet facilities there. The nearest place is Pearl’s Centre, which is quite a distance away for the elderly, the handicapped and parents with kids in tow. Can the authorities consider building such facilities for its passengers? The Land Transport Authority (LTA) is upgrading many of its stations with lifts for the elderly and handicapped. However, I have found such lifts to have little or no ventilation. Can the LTA consider installing bigger fans in the lifts and also include electronic links to station control so that if an alarm goes off, they will be able to act straightaway?”
