

# Hygiene

**“Install auto-sensor taps in food centres and toilets.”**

**MR CHIA LIN CHEOK:** “The authorities should install auto-sensor taps in food centres and toilets. Despite the Health Promotion Board’s efforts at inculcating proper hygiene habits, many people do not use the wash basins and taps properly. For example, some users spit into the basins and blow their noses, and use their mucus-stained hands to turn the taps. Auto-sensor taps will ensure better hygiene.”
