

Town Council is working on it

Letter from Grace Wong
Public Relations Manager
Marine Parade Town Council

WE REFER to “Whatever happened to those in-lift urine detectors?” (May 21).

We wish to inform that Block 93 Paya Lebar Way will be undergoing the Lift Upgrading Programme and Neighbourhood Renewal Programme this year.

We have installed urine detector devices in the lifts. We will intensify public education through notices, posters as well as our newsletter as a visible channel to inculcate the sense of ownership of the environment.

In light of the feedback, we have also instructed our conservancy workers to increase the frequency of cleaning works and to monitor the lifts closely. Please be assured that we will conduct more random checks to ensure that the daily cleaning is carried out consistently.

We thank Mr Edward Tan for the feedback. Should there be any queries on the maintenance of the estate or its surroundings, please contact our Town Council at 1800 287 6530.
