☑ WE TRY our very best to keep our children clean at home. But when the children go to school, they are ordered to sit on the floor in the halls, the classrooms, and even the floor of the canteens.

The children sit on the floor with their shoes on, they touch the floor with their hands and then rub their noses.....It is no wonder that HFMD occurs frequently in schools.

With the H1N1 virus making a comeback, we should not let children sit on the floor in school.
